1,000 EGP/mo
FLAT B2B SAAS + DISCOVERY TAKE

154 Shops (EGP 1.85M)
YEAR 3 SOM TARGET (CAIRO & ALEX)

1. THE PROBLEM PAIN POINT

In Egypt's men's grooming sector, customers are strictly loyal to individual craftsmen, not shop brands. Demand bunches heavily on 1–2 star barbers while other chairs sit empty. Because shops enforce strict "first-come, first-served" rules to protect walk-in fairness and rely 100% on manual paper ledgers, regulars endure **30–60 min blind waits** or walk out.

Cost to Shop: A typical 4-chair shop loses **~10,800 EGP/mo (~130,000 EGP/yr)** from just 3 lost haircuts/day (120 EGP/cut), while handling 5–10 daily availability calls and ~5 calls per barber mid-haircut.

2. THE SOLUTION PRODUCT

A barbershop-only vertical marketplace + lightweight live queue operating system:

- **Live Per-Barber Queue Visibility:** Zero-download mobile web app via QR codes. Clients track real-time queue depth and receive proximity alerts to arrive just-in-time without skipping the walk-in line.
- **<15s Front-Desk Tablet Logger:** One-tap chair toggles, barber pause/resume, and automated daily cash/cut tallies replacing paper ledgers.
- **Phase 2 Monetization Features:** Once queue fairness is proven, unlocks deposit-backed (30–50 EGP) service-sized bookings (30m hair, 20m beard), dual-axis verified reviews, and portable barber profiles.

3. TARGET CUSTOMERS & ICP MARKET FIT

- **Primary Buyer (B2B):** Owners of multi-chair, upper-mid barbershops (3–8 chairs, charging 100–250 EGP/cut) in Greater Cairo (launching in New Cairo and Nasr City) currently trapped on paper logs.
- **End-Users & Barbers:** App-literate men aged 18–35 loyal to a specific barber (or discovering via reels), and barbers (20–35) seeking shift pacing and portable digital reputation.

4. TEAM & FOUNDING STRUCTURE CAP TABLE

Founder	Role & Responsibility	Equity
Nooreldeen	**CEO & Product Owner** • Customer discovery (all 6 interviews), product direction, pricing design.	35%
Abdelrahman	**CTO** • Real-time WebSocket sync (<2s), tablet logger, mobile web client architecture.	30%
Ahmed	**COO** • Shop onboarding, field operations, in-person training in New Cairo & Nasr City.	25%
Option Pool	Reserved for key early technical & operational hires.	10%

Terms: 4-year vesting with 1-year cliff, full IP assignment to the company, and mutual non-compete.

5. MARKET SIZING (RECONCILED) OPPORTUNITY

Tier	Value	Methodology & Reconciliation
TAM	**EGP 67.2M – 82.2M**	Top-down (0.5% of EGP 12B+ barber spend) vs. Bottom-up (6,853 listed shops × 12,000 EGP/yr); reconciles within 18%.
SAM	**EGP 16.0M**	1,330 tech-ready urban barbershops in Greater Cairo & Alex charging ≥100 EGP/cut (<1% gap between methods).
SOM	**EGP 1.85M**	**154 active shops (Year 3)** across Cairo/Alex (scaling from 24 in Y1 → 68 in Y2 with 15% annual churn).

6. BUSINESS MODEL & PRICING UNIT ECONOMICS

B2B SaaS + Marketplace Discovery Commission:

- **Flat 1,000 EGP/month subscription** (12,000 EGP/yr) per shop after a 1-month free trial. Recovers investment in just ~9 haircuts/mo (<10% of walk-out losses; far below Fresha's ~3,700 EGP/mo).
- **10–15% Marketplace Take-Rate** strictly on *net-new* customers acquired via discovery (Months 7–12). Free for customers and barbers.

7. EVIDENCE SO FAR & VALIDATION DE-RISKING

- **6 *Mom Test* Field Interviews** across 2 Cairo shops (1 owner, 1 receptionist, 2 barbers, 2 clients):
  - 100% paper logging, 0 software spend, uncounted walkouts confirmed.
  - Regulars call barbers directly mid-cut; receptionists overwhelmed during rushes.
- **Critical Pivot from Evidence:** Both shops strictly prohibit phone reservations to avoid walk-in fights. We pivoted from advance-only booking to a *fair live wait queue* first.
- **Commercial Traction & Pilot:** Shop 1 owner committed verbal interest in a free trial. Launching a 4-week pilot in 2–3 shops.

Targets: ≥85% walk-ins logged in <2 min • ≥90% cuts closed on tablet • ≥2/3 pilot shops converting to paid 1,000 EGP/mo.
